A SPECIFIED HTTP OBJECT FOR ACCELERATION OF RELEVANT CONTENT
OPERATIONS**

RESPONSE AFTER FINAL

MAILSTOP: AF

Commissioner for Patents

P.O. Box 1450

Alexandria, VA 22313-1450

Sir:

In response to the Final Official Action mailed September 21, 2005, Applicant hereby submits the following remarks.

Reconsideration and allowance of the above-referenced application are respectfully requested. Claims 1-38 are unchanged and remain pending in the application.

Claims 1-2, 6-7, 11-14, 18-21, 25-26, 30-33, and 37-38 stand rejected under 35 USC 102(e) in view of US Patent No. 6,871,236 to Fishman et al. This rejection is respectfully traversed.

Each of the independent claims 1, 13, 20, and 32 specify transfer of an HTTP response to an HTTP request, where the HTTP response includes a first content object (having been requested in the HTTP request) and a content operation identifier: the content operation identifier specifies a directive for prefetching an identified second content object, where the prefetching is a content operation that is distinct from presentation of the first content object.
